

I have been suffering from chronic low back pain for the better part of 13 years. At times, my back pain became severe and greatly affected my normal daily activities. I have tried various methods for pain relief culminating in chiropractic care, which I have been now receiving for the past 12 plus years; any pain relief was minimal and short lived at best. Not long ago, I was given a gift certificate for an evaluation and treatment for the Joshua Tree Physical Therapy office in Hayden. After only three treatments, I am pleased to report that I believe success is now possible as my pain level has significantly decreased. Now, after nine treatments, I am now able to fully function pain free! I can now participate in family activities like tent camping and fitness walking.

Although I have been pain free for the past two weeks, the staff at Joshua Tree Physical Therapy invited me to return for a complimentary re-evaluation to make sure that I can maintain the progress I've made. Nobody has ever been so professional and caring!

Thank You Very  
much!
