

Dear Kevin, Terry, and Tara:

In December of 2001 I slipped on ice and my life changed completely. The injury to my back was severe enough to cause me to quit school. I couldn't sit upright for an hour at a time to attend classes. I also had to quit my job at the Department of Family Services as I could no longer lift a child.

I tried chiropractic for relief of my pain. I got short term relief usually a matter of hours only.

I gave up on myself and sank into depression deep enough to require anti-depressants. For two years I sat in my recliner gaining weight and waiting to die.

In the summer of 2004 my daughter sought help from you for her back problems. After her first visit she told me you could help me. Although I trust her judgement a bad experience with physical therapy a few years ago made me unwilling to try again. After her next treatment she again told me to let you help me. She assured me I would love all of you.

SHE WAS RIGHT!!!

Your loving attention and expert therapy and by the grace of God you are working a miracle for me. With each treatment you are restoring my health & you have already restored my will to live.

THANK YOU!

Yours in love and gratitude
